

## Bio-Feed™ Metering Pump

### Beneficial, low-cost, around the clock proactive product dosing!

The Bio-Feed metering system allows the pond manager to provide ongoing product delivery with minimal effort. Wisconsin Pond Products bacteria, enzymes, and dye along with liquid alum and algaecides can be used with the Bio-Feed Metering System.

### Capability

Bio-Feed's unique 7- day clock can program dosing events that occur one day per week, all weekdays, all weekends or every day. This means easy programmability up to 24 events with variable run times from 1 second to 20 minutes.

### Voltage Options available

- 115 Volt
- 230 Volt
- Battery-Powered

12 Volt DC battery capabilities make delivery available in remote locations.

### Installation

Simply install the standard Bio-Feed metering system in an existing aeration enclosure or nearby structure. The 3/8" delivery line is easily buried to the pond edge. For best results, discharge near diffusers, fountains, or waterfalls.

# Bio-Feed™ Metering Products

## Water Quality Enzymes

Water Quality Enzymes **speed up nature's** natural decomposition cycle by turning organics into simple sugars which are quickly digested by bacteria. Safely and naturally improve the health of your pond by **restoring nature's balance**.

- Stimulates "Naturally Occurring" Bacterial Activity
- Improves Water Clarity
- Reduces Pond Odors
- Improves Aesthetics
- Safe for Fish and Aquatic Organisms
- Safe for Humans and Pets

*Available in 1, 2.5, 5, and 55 gallon containers.*

## Liquid Water Clarity Bacteria

Safely and naturally improves water quality parameters by reducing organic compounds in the water column. These bacteria consume the simple sugars that have been created through the use of the early season enzyme, thus tying up additional nutrients that algae and nuisance vegetation need to grow.

- Reduces Nuisance Algae
- Improves Water Clarity
- Reduces Nutrient Loads
- Safe for Fish and Aquatic Organisms
- Safe for Humans and Pets

*Available in 1, 2.5, 5, and 55 gallon containers.*

## Application Guide - When & What Products

**April** - Water Quality Enzymes

**July** - Liquid Water Clarity Bacteria

**May** - Water Quality Enzymes  
Liquid Water Clarity Bacteria  
-  $\geq 65^{\circ}\text{F}$

**August** - Liquid Water Clarity Bacteria  
Water Quality Enzymes -  $< 65^{\circ}\text{F}$

**September** - Water Quality Enzymes

**June** - Liquid Water Clarity Bacteria
