Equipment and cleaning service

Aeration Maintenance Services

Wisconsin Lake & Pond Resource maintains a full service maintenance and installation department. Our technicians are ready to assist you with all your service needs.

- **System maintenance and cleaning**
- **Component upgrades**
- **Repair and diagnostics**
- **Seasonal maintenance plans**

Compressor service Don't let your valuable compressor be exposed to the harsh conditions over the winter. Our service technicians will remove your compressor; house it in our facility under a controlled environment and perform the required maintenance, repairs, and upgrades. The compressor will be ready for install when spring arrives.

Component upgrades Still operating with outdated, worn, or non-working components? Our technicians will thoroughly examine your system and provide upgrade options.

- **Aluminum manifold assemblies vs galvanized**
- **Steel, lockable, compressor cabinets**
- **Self-sinking rubber airline vs poly floating line**
- **Fine pore disk diffusers vs open flow diffusers**

Winter Operation? Help your system run flawlessly with a fall tune up and cleaning. You have a lot invested in your fishery! Ensure your system runs all winter.

Estimated costs for aeration maintenance are:

- **1 diffuser system - \$185.00**
- **2 diffuser system - \$215.00**
- **3 diffuser system - \$245.00**
- **4 diffuser system - \$275.00**
- **Larger systems – inquire for pricing**

*Includes compressor maintenance, diffuser cleaning, system testing, cabinet cleaning, and manifold balance.
Does not include replacement components.*
