

Pond Development

Wisconsin Lake & Pond Resource LLC provides professional pond development products and services for both private and commercial construction projects. A beautiful backyard pond is the dream of many homeowners. For commercial projects, coordination, timely completion, and professionalism are demanded by general contractors. Our staff will satisfy both! Without proper design and planning, these projects can turn into a disaster. A well designed pond will maximize your enjoyment and minimize your maintenance needs. Let the professionals at Wisconsin Lake & Pond Resource LLC help you develop the pond of your dreams.

Consulting and Design Assistance

Constructing a pond is more than just digging a hole in the ground with hopes it fills with water. There are many items to consider and proper planning is critical. Wisconsin Lake & Pond Resource LLC has significant experience consulting with contractors, excavators, and homeowners when building ponds for wildlife, swimming, fishing, or storm-water. Items we go over in detail with the client include:

- *Slope* ● *Depth and Contouring* ● *Maintenance Programs*
- *Overflow Structures* ● *Shoreline Stabilization* ● *Aeration*
- *Fishery Establishment* ● *Aquatic Plant Installation*

Synthetic Pond Liners

Wisconsin Lake & Pond Resource LLC specializes in working directly with home owners, developers and contractors to install synthetic liners where the natural basin would not normally allow a lake or pond. With our ability to install the largest single panel in the liner industry (up to 120,000 sq.ft.), quick turnaround times, uncompromising quality, and customer service - we provide significant savings over typical liner installations.

We utilize polyethylene liners that contain "5" layer construction resulting in an incredibly strong tear and puncture resistant light weight material.

- *Single Panel Technology* ● *Wedge and Heat Gun Welding*
 - *20, 24, 36 or 40 mil thickness* ● *Design Assistance*
- *Complete Installation Available* ● *Fish Safe Materials*

Aquatic Plant Sales & Installation

A community of diverse aquatic plants is an integral portion of a lake or ponds ecosystem. They play a key role in maintaining and enhancing the ecological balance in ponds, lakes, wetlands, rivers, and streams. Beneficial aquatic plants have many values including filtering nutrients and toxic chemicals, stabilizing shorelines, and providing important fish and wildlife habitat. Wisconsin Lake & Pond Resource LLC sells a variety of greenhouse raised aquatic plants for our clients. We provide installation or can supply instructions for do it yourself clients. Installing aquatic plants can be done in both new and existing lakes and ponds.

- 1 & 2 year potted nursery stock
- Installation available
- Emergent, sub-emergent, and wetland species available
- Quality plants raised in Wisconsin

Fish Stocking and Fishery Establishment

One of the greatest rewards to owning a pond is the ability to catch quality fish right in your backyard. That does not come without proper planning right from the start. Wisconsin Lake & Pond Resource LLC **FISHERIES BIOLOGISTS** will work with the client to define species and stocking rates, habitat requirements, water quality parameters, and harvest recommendations. Wisconsin Lake & Pond Resource LLC provides the following services:

- Stocking of most fish species
- Habitat design and install
- Control of undesirable species
- Fishery surveys
- Management assessments
- Harvest

Aeration Systems and Decorative Fountains

Wisconsin Lake & Pond Resource LLC utilizes aeration systems whenever possible when designing or managing a lake or pond. We can improve water quality parameters just by simply installing an adequately sized aeration system in most situations. Where shallow water exists or the aesthetics are a priority, decorative fountains have been a helpful tool. We are a dealer and authorized service center for Aquamaster Fountains & Aerators and Kasco Marine Inc.

Wisconsin Lake & Pond Resource LLC will design and install aeration or fountain systems in ponds from less than one acre to multiple acre lakes!

Aeration Services

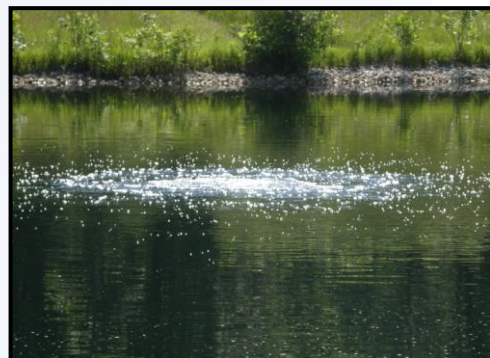

- Design, sales, installation
- Maintenance, repairs, and service

Decorative Fountain Services

- Sales and installation
- Service and warranty repairs

Seasonal Services

- Professional Pond Management
