

Professional Pond Management

The demand for professional pond management services is continually growing. Wisconsin Lake & Pond Resource LLC's pond management team consists of a diverse group of specialists to serve the wide array of our pond clients' needs. Our pond management team is available to help turn your **EXISTING** pond into a valuable asset. We provide a wide array of pond management services focusing on water quality improvement to a diverse clientele. Our staff consists of biologists, water quality managers, commercial applicators, service technicians, and marketing and administrative personnel.

Consulting and Water Quality Monitoring

Many of our customers have commented that pond consultations are the **MOST VALUABLE** service we offer! Our biologists will meet with you on site to discuss your pond concerns, collect physical, chemical, and biological data on your pond, and recommend management strategies. A professional pond consultation is the **BEST PLACE TO START** on the road to a healthy pond!

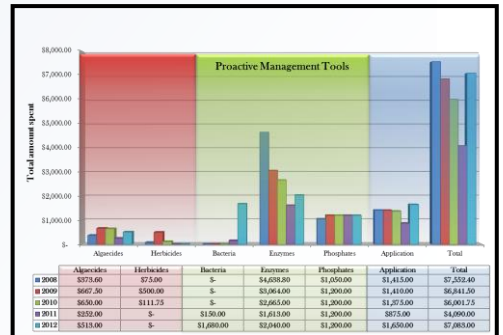

- *Water Quality Monitoring*
- *Sediment Analysis*
- *Aquatic Plant Identification*

Professional Application Services

Algaecides and herbicides have proven to be a very effective Integrated Management Tool. Many aquatic plants and certain algae species can only be managed with these tools. However, **OVER USE OF PESTICIDES CAN CAUSE ADVERSE EFFECTS**. When pesticides are required to manage aquatic plants and algae, precision application is critical to avoid damage to non-target species and drift outside the treatment area. Wisconsin Lake & Pond Resource LLC utilizes state of the art equipment equipped with GPS guidance systems and flow control meters.

- *Trained, licensed, and insured commercial applicators*
 - *EPA registered algaecides and herbicides*
 - *DNR state permits and/or licenses required*
- *Treatments for select species including filamentous algae, Cattails, pondweed spp., Eurasian water milfoil, elodea and*

Fishery Management and Stocking

One of the greatest rewards to owning a pond is the ability to catch quality fish right in your backyard. That does not come without proper planning and management. Wisconsin Lake & Pond Resource LLC **FISHERIES BIOLOGIST** will work with any pond owner to make sure the proper tools are in place so your pond can sustain a quality fishery.

- *Stocking of most fish species*
- *Habitat design and install*
 - *Control of undesirable species*
 - *Fishery surveys*
- *Management assessments*
- *Harvest recommendations*

Aeration Systems and Decorative Fountains

Wisconsin Lake & Pond Resource LLC utilizes aeration systems whenever possible when designing or managing a lake or pond. We can improve water quality parameters just by simply installing an adequately sized aeration system in most situations. Where shallow water exists or the aesthetics are a priority, decorative fountains have been a helpful tool. We are a dealer and authorized service center for Aquamaster Fountains & Aerators and Kasco Marine Inc.

Aeration Services

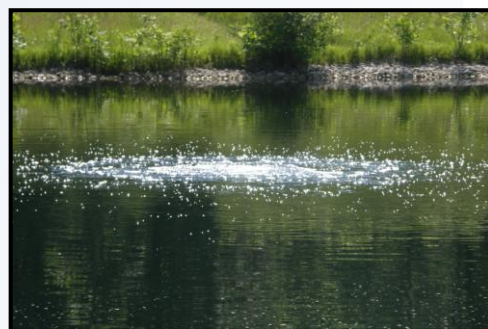

- *Design, sales, installation*
- *Maintenance, repairs, and service*

Decorative Fountain Services
