

# Wisconsin Lake & Pond Resource LLC

"Providing Professional Resources for Management of Your Lake or Pond"

## You Provide the Location.....

## .....We'll Provide the Water

### Wildlife and Wetland Ponds

Attracting wildlife can be accomplished on many types of properties ranging from rural backyards to multi-acre hunting plots. For years, wildlife biologists have determined there are three crucial elements to support wildlife – food, cover, and WATER.

### Maximize Hunting Potential

Most often, recreational properties are missing the water. Wisconsin Lake & Pond Resource LLC works with clients to improve the quality of their land by adding water features to their property. We have the knowledge, ability, and technology to construct artificial wetlands, wildlife ponds, and animal watering holes on properties that do not support them naturally.

### Create Diverse Habitat

### WLPR Wildlife and Wetland Ponds Feature:

- Heavy duty poly-ethylene pond liners
- Turf reinforcement mat overlayment
- Beneficial aquatic plantings
- Health certified, hatchery raised game fish

### Increase Property Value

Consulting, planning, and design  
 Aquatic plant establishment  
 Fish Stocking

Pond liner installation  
 Management and maintenance  
 Aeration System Installation

### From Design To Completion

N7828 Town Hall Rd  
Eldorado, WI 54932
